

NOTTINGHAM LAKESIDE ARTS

DJANOGLY THEATRE TECHNICAL INFORMATION

AS OF DEC 2016

- If we do not receive your technical requirements and a lighting plan on Lakeside's plan at least four weeks before your visit, pre-rigging cannot be guaranteed.
- Please note that we will not pre-rig using a generic plan.
- Please inform us as at least two weeks in advance if your performance uses strobe lighting, naked flames, pyrotechnics or any other special effect or equipment. Please note that if naked flame or pyrotechnics are used we require full details on usage and copies of your Risk Assessment before liaising with our Fire Officer.
- All equipment brought into the building must be PAT tested.
- All electrical items should have a sticker showing the safety test date, as well as a reference number. You will also need to bring along the test certificate, which will list all the equipment and show the same reference numbers. If this requirement is not met, then you will not be allowed to use the equipment anywhere in the building until it has been tested.
- Lakeside has no facilities to carry out the PAT test within the building and will not bear the cost of any testing. It is in your own interest to have all equipment tested prior to your visit.

LIGHTING
