Thank you for picking up this puppet making kit! You will need:

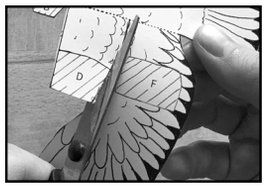

Scissors | Glue Stick | Decorating materials *(eg. colouring pencils, feathers etc)*

Before starting the steps below, it can be easier to colour in your owl first.

Step One: Cutting *(Careful scissors are sharp!)*

Cut round the shapes as close to the lines as you can, following these:

There are two lines to cut inside next to the wing you can spot on these lines as well.

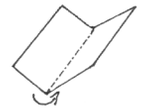

Step Two: Folding

There are 2 types of folding lines: Dotted Line & Dot-Dash Line

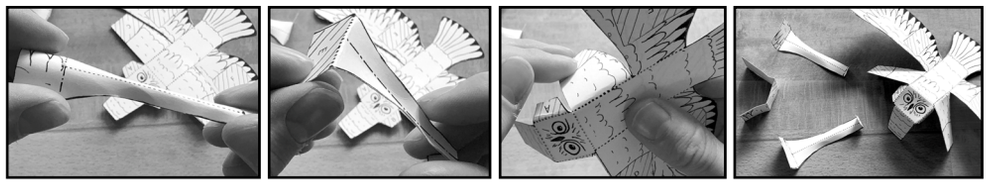

Dotted lines fold into a mountain:

Dot-Dash lines fold into a valley:

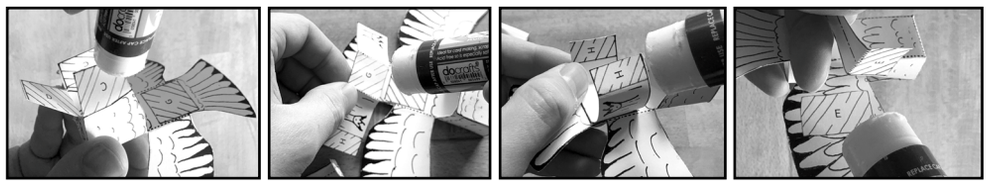

Fold all of the dotted and dot-dash lines: *(the wings are folded both ways so they flap!)*

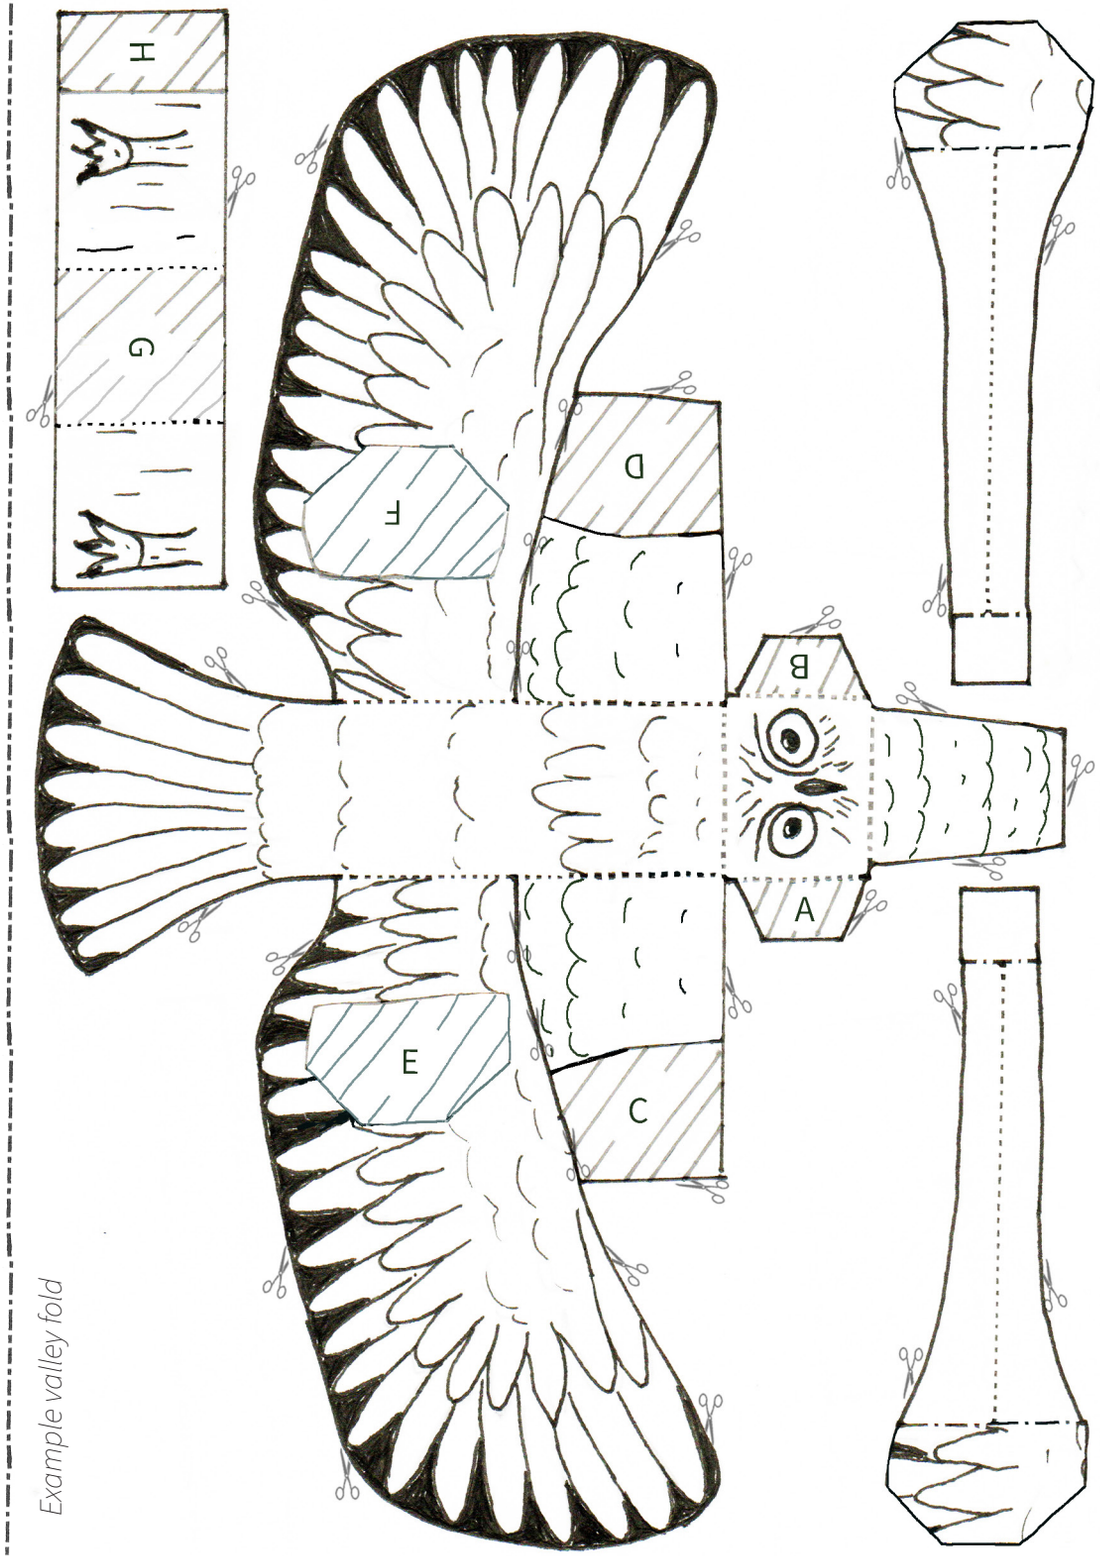

Step Three: Glueing *(Careful glue is sticky!)*

Put glue on all the striped areas. Then match up the letters and press the pieces together. Leave a few minutes for the pieces to dry so they stick together.

You can finish decorating to your heart's content. Don't forget to **share** your work with us at **@HalfaString** or by entering our **online gallery** (scan the front). We would love to see them!
